

Marker Genes

Widget provides access to a public database of marker genes.

Outputs

- Genes

Database sources:

- PanglaoDB

Oscar Franzén, Li-Ming Gan, Johan L M Björkegren, PanglaoDB: a web server for exploration of mouse and human single-cell RNA sequencing data, Database, Volume 2019, 2019, baz046, <https://doi.org/10.1093/database/baz046>

- CellMarker

[CellMarker: a manually curated resource of cell markers in human and mouse](#). Nucleic Acids Research. 2018.

Data is preprocessed in Orange readable format and it is hosted [here](#). One can use [Databases update](#) widget to download (or update) files locally.
