

Reshape Map

Builds or modifies the shape of the input dataset to create 2D maps from series data or change the dimensions of existing 2D datasets.

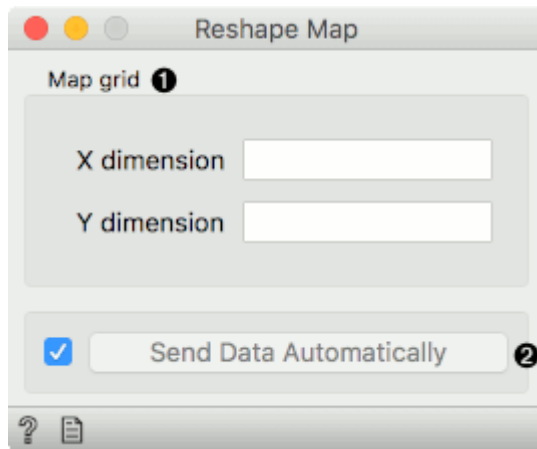

Inputs

- Data: input dataset

Outputs

- Map Data: data as a map

The **Reshape Map** widget transforms the input data to a map.

1. Map shape:
 - The X dimension.
 - The Y dimension.
2. Send data automatically or press *Send*.
